PROFESSIONAL SUMMARY

Data Science & Analytics student who builds working AI systems rather than just studying them. Shipped an AI-powered scanning tool that pairs machine learning with Claude-API-generated explanations, automated its data pipeline with GitHub Actions, and hardened it toward production for real users. Pairs that hands-on AI implementation experience with a year+ leading internal systems, workflow, and digital-transformation work for a community organization — translating operational needs into practical, documented technology solutions.

SKILLS

AI & Automation: Anthropic Claude API integration & prompt design, LLM-generated explanations, XGBoost/SHAP explainable ML, GitHub Actions workflow automation, API integration & orchestration

Business Systems & Workflows: Internal systems & workflow design, digital transformation, process documentation, data authenticity/reliability auditing, cross-functional collaboration

Languages & Tools: Python, SQL, JavaScript, HTML/CSS, Git/GitHub, WordPress

Data & Platforms: Power BI, PostgreSQL/MySQL/Supabase, Parquet, Optuna, Microsoft Teams/Outlook/Google Workspace

EXPERIENCE

IT & Media Strategy Associate

Aug 2025 – Present

PERMIKA Toronto (Indonesian Student Organization in Toronto)

Toronto, ON

- Led digital transformation work across internal systems, workflows, and automation, translating day-to-day operational pain points into practical technology solutions.
- Developed media strategy and managed digital platforms supporting organization-wide communication and outreach.

Web Development & Technical Support

Jul 2025 – Present

QuickRn Canada

Remote

- Maintained and updated WordPress website content and resolved website/online-course access issues through technical troubleshooting and cross-team collaboration.
- Documented technical issues and resolutions, communicating clearly with customers via email to ensure a positive user experience.

Career Peer

Sep 2026 – Present

Seneca Works, Seneca Polytechnic

Toronto, ON

- Support students and alumni with resume, cover letter, and job-board guidance, maintaining records in SharePoint and contributing to Career Threads workshops and events.

PROJECTS

AI-Powered IDX Stock Scanner (Screener Saham)

Ongoing

Personal Project — github.com/suryalionael/idx-stock-scanner-agent

- Built a three-layer AI pipeline — rule-based filtering, XGBoost ranking, and Claude-API-generated natural-language explanations — to scan the Indonesian stock market (IDX) across Swing, Scalping, and Long Term modes.
- Automated daily data scans with GitHub Actions and added IDX trading-calendar awareness so the pipeline exits cleanly on non-trading days and flags stale data to users.
- Replaced simulated broker-activity data with a live Index Alpha API integration and a quota-safe, parquet-cached fetch layer, removing the project's primary blocker to responsible use by paid users.
- Ran a structured technical audit — per-mode verdicts, risk lists, fix lists — to prioritize data-authenticity and reliability work before offering the tool commercially.

FloodCast Jakarta — Flood Risk Prediction

2026

Dicoding AI Impact Challenge — github.com/suryalionael/Datathon-Dicoding2026-FloodRisk

- Built a multi-horizon XGBoost ensemble with SHAP explainability and Optuna-tuned hyperparameters to forecast urban flood risk in Jakarta.
- Developed an interactive Leaflet.js dashboard to visualize predictions and support planning decisions; scoping a Microsoft Azure deployment for Phase 2.

EDUCATION

Honours Bachelor of Data Science and Analytics

2024 – Expected Apr 2028

Seneca Polytechnic, Newnham Campus

Toronto, ON

- Cumulative GPA: 3.9 | President's Honour List (Winter 2025, Winter 2026)
- Relevant Coursework: Python Programming, SQL, Statistics, Database Systems, Data Visualization, Machine Learning
