PROFESSIONAL SUMMARY

Data Science and Analytics student (Seneca Polytechnic, graduating April 2028) who builds products and leads teams. Shipped Aspen OS, a project management platform the QuickRN team uses daily, built a validated policy decision dashboard on real government data, and led a ten-person campaign team. Turns ambiguous business questions into working prototypes and presents them to non-technical stakeholders.

EDUCATION

Seneca Polytechnic | Honours Bachelor of Data Science and Analytics | Toronto, ON 2024 – Apr 2028 (Expected)
• GPA 3.9/4.0 | President's Honour List (Winter 2026) | SSF International Student Merit Award
• **Relevant Coursework:** Business Intelligence, Presentation Skills, Data Visualization, Data Mining, Simulation and Modelling

PROJECTS

Aspen OS | Next.js, TypeScript, Supabase, Tailwind CSS, Vercel Internal Software, Solo Build
• Designed and built, from concept to deployment, a project operating system (tasks, kanban boards, documentation, collaboration) that the QuickRN team now runs its daily work on.
• Defined scope with non-technical users, documented sprint plans, a roadmap, and a design system, and shipped 130+ commits backed by Playwright end-to-end tests and GitHub Actions.

Nutrition Priority Index | Python, GeoPandas, Streamlit, pytest Policy Analytics
• Framed a resource-allocation question (which of Indonesia's 38 provinces to prioritize for child nutrition) and built a transparent ranking index from real government data, validated against outcomes (Spearman $r = 0.74$).
• Delivered a six-page live Streamlit dashboard and executive summary for non-technical decision-makers, documenting every data limitation, backed by 67 automated tests.

IDX Stock Scanner | Python, XGBoost, Claude API, Parquet AI Engineering, FinTech
• Built a daily decision-support agent for Indonesian equities in three layers: a rules engine filters candidates, an XGBoost model ranks them, and the Claude API explains each pick in plain language.

Customer Churn Prediction | XGBoost, SHAP, FastAPI, Streamlit Machine Learning
• Built an end-to-end telecom churn system with a calibrated model, SHAP explanations, decision thresholds optimized for retention ROI, and drift monitoring, served through FastAPI and Streamlit.

EXPERIENCE

Career Peer | Seneca Works, Seneca Polytechnic, Toronto, ON Sep 2026 – Present
• Coach students and alumni on resumes and cover letters; support career events, workshops, and Career Threads.

Data Entry and Web Development | QuickRN, Remote Jul 2025 – Present
• Built and launched three production websites, gathering requirements from non-technical stakeholders.
• Resolved website and course-access issues, maintained WordPress content, and documented fixes for customers.

IT and Media Strategy Associate | PERMIKA Toronto, Toronto, ON Aug 2025 – Sep 2026
• Led the League of Toronto 2026 social media campaign, coordinating a team of ten from planning through delivery.
• Built internal tools for event management and member engagement; supported workflow automation.

Software Engineering Intern | CV. Veda Sakti Dharma, Jakarta, Indonesia Jun 2025 – Aug 2025
• Built a Python application automating payroll tax (PPH 21) calculations and payslips; validated payroll data for accuracy.

LEADERSHIP

Student Council President | SMAK Penabur Summarecon Bekasi, Bekasi, Indonesia 2023 – 2024
• Led the council as liaison between students, faculty, and administration; earned Golden Flag certification (248 of 251).
• Directed SUBSCRIBE 6, a seven-day sport and art festival, as chief committee: managed budget and logistics, delivered the opening speech.

SKILLS

Business and Delivery: Requirements gathering, roadmapping, sprint planning, executive summaries, presentations
Analytics: Python, SQL, R, pandas, Power BI, Tableau, Microsoft Excel, Streamlit, statistics
Build and Design: TypeScript, Next.js, React, HTML, CSS, JavaScript, Tailwind CSS, Supabase, PostgreSQL, Canva, Git
Machine Learning and AI: XGBoost, scikit-learn, SHAP, Claude API
