Professional Summary

Data Science and Analytics student at Seneca Polytechnic (3.9 GPA) who builds reporting systems end to end: SQL and dbt metric layers, tested data models, and interactive dashboards on real datasets. Built a governed revenue mart with automated reconciliation tests and a six-page dashboard that ranks 38 provinces for intervention. Supports live web tools and student career services, with working knowledge of Excel, Google Sheets, and Power BI.

Education

Seneca Polytechnic

Honours Bachelor of Data Science and Analytics

Toronto, ON

Expected April 2028

- Cumulative GPA 3.9 out of 4.0; President's Honour List, Winter 2026
- Coursework: Business Intelligence, Data Visualization, Statistical Methods, Database Design, Data Mining, Presentation Skills

Technical Skills

Reporting and BI Microsoft Excel, Google Sheets, Power BI, Streamlit dashboards, data visualization, KPI definition

Data and Databases SQL, dbt, PostgreSQL, MySQL, Supabase, data modeling, data quality testing

Programming Python (pandas), R, JavaScript, TypeScript, Google Apps Script

Analytics Statistics, forecasting, scikit-learn, XGBoost, SHAP, spatial analysis

Tools Git, GitHub Actions, Docker, Microsoft Teams, Outlook, Google Workspace

Projects

dbt E-Commerce Analytics Mart | *dbt, PostgreSQL, SQL, Docker, GitHub Actions*

2026

- Built a dbt project on the real Olist Brazilian e-commerce dataset (95,420 customers) that turns raw orders into four tested marts: an order fact table, product and customer dimensions, and a monthly revenue metric layer.
- Defined revenue once in a single macro so monthly revenue, customer lifetime spend, and the fact table reconcile by design; caught a source grain issue where order-level customer IDs would have shown one order per customer.
- Wrote generic and custom data tests, including an error-level revenue reconciliation and a warning-level payment check that flagged 293 customers (0.3%) whose amounts paid differ from item spend, documented rather than suppressed; tests run in CI.

Nutrition Priority Index, Indonesia | *Python, pandas, GeoPandas, Streamlit, pytest*

2026

- Built a decision-support platform that ranks Indonesia's 38 provinces for child-nutrition intervention using public Statistics Indonesia data, with scripted API ingestion, YAML data contracts, checksummed run logs, and 67 automated tests.
- Validated the index before publishing (Spearman 0.74 against stunting outcomes, 0.67 excluding four partial-coverage provinces; stable under $\pm 20\%$ weight changes) and chose a simpler indicator over PCA after a head-to-head comparison.
- Shipped a live six-page Streamlit dashboard (filterable rankings with CSV export, interactive map, province profiles) with an executive summary for non-technical readers.

Customer Churn Prediction | *Python, XGBoost, SHAP, FastAPI, Streamlit, Docker*

2026

- Built an end-to-end telecom churn system with calibrated XGBoost probabilities, SHAP explanations, and ROI-optimized thresholds to target retention spend; served through FastAPI and Streamlit with drift monitoring and tests.

Experience

QuickRN Canada

Remote

Web Developer and Data Operations

July 2025 – Present

- Built three production websites and Aspen OS, an internal task, kanban, and documentation platform (Next.js, TypeScript, Supabase) that the team uses daily.
- Maintained exam-prep content data and WordPress content, resolved website and course-access issues, and answered customer inquiries by email while documenting each resolution.

Seneca Works, Seneca Polytechnic

Toronto, ON

Career Peer (Contract, Part-time)

September 2026 – Present

- Support students and alumni with resumes, cover letters, and career resources; assist at events; keep SharePoint records.

PERMIKA Toronto

Toronto, ON

IT and Media Strategy Associate

August 2025 – September 2026

- Built internal tools for event management and member engagement across the organization's digital platforms.
- Led the social media campaign for League of Toronto 2026, coordinating a team of ten from planning through delivery.

CV. Veda Sakti Dharma

Jakarta, Indonesia

Software Engineering Intern

June 2025 – August 2025

- Built and tested a Python payroll tax (PPH 21) application that automated employee tax calculations and validated payroll data.
