PROFESSIONAL SUMMARY

Data Science & Analytics student (3.9 GPA) who builds data platforms end to end: a Kafka, Spark, and Delta Lake streaming lakehouse, a tested dbt mart on PostgreSQL, and an XGBoost + Claude API equity scanner, plus a production web app (Next.js, TypeScript, Supabase) used daily at QuickRN. Looking to build a working data product with a cross-functional team at RBC Amplify.

EDUCATION

Seneca Polytechnic

Honours Bachelor of Data Science and Analytics

Toronto, ON
Expected Apr 2028

- Cumulative GPA 3.9/4.0; President's Honour List (Winter 2026)
- Relevant coursework:** Advanced Database Design, Data Mining, High Performance Computing, Business Intelligence

TECHNICAL SKILLS

- Languages:** Python, SQL, TypeScript, JavaScript, R
- Data Engineering:** Kafka, Spark Structured Streaming, Delta Lake, Airflow, dbt, DuckDB, ETL/ELT, data quality testing
- Databases:** PostgreSQL, MySQL, Supabase
- ML & AI:** XGBoost, scikit-learn, SHAP, Optuna, Prophet, feature engineering, LLM integration (Claude API)
- APIs & Web:** FastAPI, Next.js, React, Streamlit, HTML/CSS, WordPress
- Tools & DevOps:** Docker, Docker Compose, Git/GitHub, GitHub Actions (CI), pytest, Power BI, Excel

PROJECTS

Streaming Clickstream Pipeline | Kafka, Spark Structured Streaming, Delta Lake, DuckDB, Docker

[GitHub](#)

- Built a real-time lakehouse for simulated e-commerce clickstream (~50 events/sec): Kafka, Spark Structured Streaming with watermarking and 10-second micro-batches, and Bronze/Silver/Gold Delta Lake tables on MinIO, queried via DuckDB.
- Designed for failure: idempotent Delta writes with Kafka offset tracking for effectively exactly-once processing, checkpointing, and a dead-letter table that keeps malformed events with failure metadata for reprocessing.
- Packaged 7 services in Docker Compose with health checks and one-command startup; wrote 74 unit, edge-case, integration, and smoke tests; set up GitHub Actions CI; added a 6-page Streamlit dashboard with pipeline-health monitoring.

Retail Sales ETL Pipeline | Python, Airflow, PostgreSQL

[Portfolio](#)

- Built a batch ETL pipeline for a real retail dataset with data validation checks, a PostgreSQL star-schema warehouse, and Airflow orchestration, designed so reruns are safe and repeatable.

E-Commerce Analytics Mart | dbt, PostgreSQL, Docker, GitHub Actions

[GitHub](#)

- Modeled the real Olist e-commerce dataset into staging, intermediate, and mart layers with dbt on PostgreSQL: an order-line fact table, product and customer dimensions, and a monthly revenue layer built on one revenue macro.
- Wrote generic, custom, and singular tests, including a revenue reconciliation check that fails the build on drift; a payment test surfaced 293 of 95,420 customers (~0.3%) with mismatched amounts. CI runs dbt build on every push.

IDX Stock Scanner Agent | Python, XGBoost, Claude API, Parquet

[GitHub](#)

- Built a daily decision-support pipeline for Indonesian equities: validated yfinance data stored in Parquet, 20+ technical features, rules-based filtering, XGBoost probability ranking, and Claude-generated explanations for each ticker.

EXPERIENCE

Web Development & Data Operations

Jul 2025 – Present

QuickRN Canada

Remote

- Built Aspen OS, an internal project management platform (Next.js, TypeScript, Supabase, Vercel) for tasks, documentation, and collaboration; built solo, in production, and used daily by the team.
- Delivered three production websites, gathering requirements from non-technical stakeholders and maintaining each after launch; resolved website and online course access issues.

Software Engineering Intern

Jun 2025 – Aug 2025

CV. Veda Sakti Dharma

Jakarta, Indonesia

- Built and tested a Python app automating PPH 21 payroll tax calculations and payslips; debugged and validated payroll data.

IT & Media Strategy Associate

Aug 2025 – Sep 2026

PERMIKA Toronto

Toronto, ON

- Built internal tools for event management and member engagement for an Indonesian student organization.
- Led the social media campaign for League of Toronto 2026, coordinating a team of ten from planning through delivery.
